Senior Project Manager

D&D Automation is a controls integrator located in Stratford, ON. We are a leading edge company that designs and implements PLC based control systems for industrial machinery, manufacturing lines, process environments and other automated facilities globally with a focus on local business.

We are looking for a self-motivated professional with proven leadership strengths. This individual will fully support the D&D Vision and Goals and fully participate and contribute to the D&D team. Strong communication skills are a must. In this environment with competing priorities, the Senior Project Manager will be responsible for planning and managing projects of varying scope and complexity to ensure both customer needs and corporate targets are met.

This position will:

- Manage multiple projects at the same time throughout the entire lifecycle
- Build and maintain great client relationships through ongoing communication and understanding of client goals
- Manage all aspects of the projects including quoting, planning, budgeting, scheduling, execution, risk management, safety and quality control
- Ensure technical reviews are completed using expertise and provide recommendations for improvements
- Ensure effective communication with team, management, customers and suppliers

Candidates must be a graduate of Electrical Engineering Technology, Robotics and Automation or a related diploma program or have a degree in Electrical Engineering with a minimum of 5 years' experience in resource and project management in the industry. This position requires current technical expertise along with proven leadership experience. The ideal candidate will enjoy conquering new challenges in a team oriented environment.

Apply in writing, no phone calls please.
